Native Plants for Wetlands

Southern Vancouver Island has many different wetland types, including swamps, marshes, bogs, fens, temporary wetland, open water and more. Classification of wetlands is based on several factors like light regime, extent of flooding, and soil characteristics. Different wetland types have their own characteristic plant communities. All provide important habitat for wildlife.

Wildflowers

<i>Helenium autumnale</i> spp. <i>grandiflorum</i>	Mountain Sneezeweed
<i>Heracleum maximum</i>	Cow Parsnip
<i>Lysichiton americanus</i>	Skunk Cabbage
<i>Mentha arvensis</i>	Field Mint
